PROFESSIONAL SUMMARY

Data Analyst with a Master's in Data Science. Built analytics pipelines processing 91M+ rows in BigQuery, deployed production RAG applications with dual-layer security, and delivered interactive BI dashboards with \$0 query costs. Fluent in Arabic, French, and English (C1).

WORK EXPERIENCE

Business Data Analyst 11/2025 – Present
byFood.com (Tablecross Inc.) Tokyo, Japan (Remote)

- Automated recurring performance reports using Python, reducing manual reporting time by 70%
- Partnered with cross-functional teams to conduct UX reviews and post-onboarding testing
- Expanded scope to include product management: writing PRDs, facilitating standups, coordinating QA

Analytics Operations Assistant (Contract) 09/2025 – 11/2025
Smollan North Africa

- Automated reporting dashboards for major FMCG clients, reducing manual data processing time by 40%
- Maintained data pipeline integrity, reducing pipeline issues by 15% through proactive monitoring and validation
- Supported daily reporting operations across the North Africa region

Data Scientist Intern 12/2024 – 06/2025
CERIST Research Center

- Built a 3D lung model integrating anatomical features with physiological parameters using ITK
- Developed preprocessing pipelines that reduced segmentation runtime by 20% and improved model accuracy by 12%

EDUCATION

Master's in Data Science 09/2023 – 06/2025
University of Algiers 1 - Benyoucef Benkhedda

Bachelor's in Applied Mathematics 11/2020 – 07/2023
University of Algiers 1 - Benyoucef Benkhedda

SKILLS

Languages

Python (Pandas, NumPy, Scikit-learn), SQL

AI/ML

Scikit-learn, XGBoost, Random Forest, RAG, ChromaDB, Gemini, Groq

Tools

Streamlit, Git, GitHub, Jupyter, VS Code

Data & BI

BigQuery, Looker Studio, Power BI, Excel

Databases

MySQL, PostgreSQL, BigQuery

Spoken Languages

Arabic (native), French (b2), English (C1), German (A1)

PROJECTS

NYC Taxi Analytics

BigQuery, SQL, Looker Studio

- Aggregated 91M raw NYC taxi trips into a 120K-row master data mart — 99.8% data reduction
- Built interactive Looker Studio dashboard with 100% cross-filtering across all dimensions

- Achieved \$0 query costs via pre-aggregation architecture
- Live demo for the Dashboard [🔗](#)

Text-to-SQL RAG Application [🔗](#)

Python, ChromaDB, Gemini, Groq, Streamlit

- Production RAG app enabling natural language querying of databases
- Implemented dual-layer security: text-level guardrails + read-only database sandbox
- Deployed on Streamlit Cloud with live interactive demo
- Live Demo [🔗](#)

E-Commerce Analytics (Olist) [🔗](#)

Python, Power BI, Scikit-learn, XGBoost

- Analyzed 100K+ Brazilian orders with interactive Power BI dashboard
- Built delivery delay prediction model using Random Forest + XGBoost
- Handled class imbalance via stratified splits and class_weight='balanced'
- Live demo for Olist Delivery Delay Predictor [🔗](#)
